## EDUCATION

---

<b>Master of Science in Data Science – University of Colorado Boulder</b>	<b>Graduation Date – May 2026</b>
GPA: 4.0/4.0   Pre-Graduate Accelerated Degree Program	
<b>Bachelor of Science in Computer Science – University of Colorado Boulder</b>	<b>Graduation Date – May 2025</b>
Cumulative GPA: 3.8/4.0   Technical GPA: 3.9/4.0   Dean's List Student	

## RECENT WORK EXPERIENCE

---

<b>Full Stack Software Developer Intern</b>	<b>June 2023 – August 2023</b>
National Aeronautics and Space Administration (NASA)	Glenn Research Center   Cleveland, Ohio
<ul style="list-style-type: none"><li>Created a web-based graphical user interface to significantly aid in the development of a prototype lunar power grid infrastructure</li><li>Developed features in the GUI to control and display data from the inverter module of the prototype</li><li>Implemented a new fast frequency measurement algorithm in VHDL for the prototype's FPGA clock</li></ul>	
<b>NPSS Library Software Developer Intern</b>	<b>January 2023 – May 2023</b>
National Aeronautics and Space Administration (NASA)	Glenn Research Center   Remote
<ul style="list-style-type: none"><li>Refactored the official NASA Numerical Propulsion System Simulation (NPSS) Power System Library resulting in crucial performance and reliability improvements to the library</li><li>Developed unit tests for every electrical component in the NPSS Power System Library</li><li>Developed a GitHub self-hosted runner that can automate any NPSS development project</li></ul>	

## PROJECTS

---

<b>Wheel Wizard Group Project</b>	<b>November 2023 – December 2023</b>
<ul style="list-style-type: none"><li>Led a team of five to develop a used-car website for browsing, posting, and purchasing used cars</li><li>Utilized the MERN tech stack, agile development methodology, and external used-car website APIs</li></ul>	
<b>Speech-to-Text Translator Project</b>	<b>August 2022 – December 2022</b>
<ul style="list-style-type: none"><li>Developed a real-time deep learning-based speech-to-text translator capable of accurately transcribing spoken language into text</li></ul>	
<b>University of Colorado Engineering Projects Expo</b>	<b>February 2022 – April 2022</b>
<ul style="list-style-type: none"><li>Led a team of four to build a 17th-century time escapement for a Physics Professor's visual teaching aid</li><li>Designed and constructed the time escapement within a 10-week window and a \$250 budget</li></ul>	
<b>C++ Console-Based Video Game Project</b>	<b>March 2022 – April 2022</b>
<ul style="list-style-type: none"><li>Developed a 2D video game entirely in C++ that merged the gameplay mechanics of "Space Invaders" with the aesthetics from the "DOOM" video game franchise</li><li>Integrated complex data structures and algorithms to seamlessly process, store, and render user data</li></ul>	

## SKILLS

---

**Programming Languages:** x86 Assembly, C/C++, C#, Python, Java, JavaScript, TypeScript, SQL, VHDL

**Front End Development:** HTML, CSS, Tailwind CSS, React, Angular, Vite, Client side GraphQL, Axios

**Back End Development:** Node.js w/Express, Django, Ruby on Rails, REST APIs, Server side GraphQL, PostgreSQL

**Algorithms:** Dijkstra's, BFS, DFS, A\*, Prim's, Kruskal's, Huffman Encoding, Ford-Fulkerson, Merge Sort, Quick Sort, SHA-256 Hashing, Minimax, Markov Decision Process, Gradient Decent, Backpropagation, RNN

**Data Structures:** Binary Search Trees, Hash Tables, Red and Black Trees, Graphs, Heaps, Linked Lists, MSTs

**Math:** Calculus, Statistics, Linear Algebra, Boolean Algebra, Digital Logic, Time Complexity, Space Complexity

**Additional Skills:** Leadership, Communication, Git, GitHub, GitLab, DevOps, Cryptography, Docker, Docker Hub
